Rev. 2015-03-01

In the present revision:

- ANALOGUE: Introduced the awesome Bellagio Conquest Black King equipped with two arms and a new all black integrated massive stand, the greatest spindle/bearing of the platter ever made with ceramic oiled treated bearing and the super powerful PWM remoted motor control. New great looking Mediterraneo and Giglio turntables that as the names reminds are designed thinking about the beautiful Tuscan Mediterranean sea, both available with an integrated new electronic speed control system and conveniently equipped with arms and Dust Cover. We introduced a new important entry the Valore PLUS 425 with the larger plinth featuring 425mm width and 9" arm. New flagship fully adjustable revolutionary designed tone-arm il Magnifico Arm made of olive tree and shaped titanium parts with weight and dynamic anti skating system.

 Introduced the new Tuscany GOLD and Tuscany RED low output MC cartridges, the Machiavelli GOLD and Machiavelli RED high output MC cartridges, the renovated Bobolino RED and Bobolino.
- **DIGITAL**: Gold Note news in the Digital sources for 2015 regards the introduction of two market missing units: the first full DSD D/A Converter able to play audio files DSD64 at 2,8MHz and DSD128 at 5,6Mhz having even 24/48 wifi connectivity a new Digital Streamer allows playing wifi all 24/192 PCM high res. audio files.
- **AMPLIFIERS:** Finally available the first Gold Note Stereo Power amplifiers combining single end design experience and high power rating. PA-1350 a stereo Power amplifier performing 350watt per channel and 600watt per channel in mono and the PA-1175 a stereo Power amplifier performing 175watt per channel and 300watt per channel in mono.
 - Also available a new Line preamp and an innovative 12 tubes output stage can equip all the 1000 series of electronics (except the amplifiers)
- **POWER SUPPLIES:** The new Modular Line 1000 series allowed the introduction of the super external power supply electronically controlled during the 2015 fall.
- **LOUDSPEAKERS**: Introduced the new XS lines composed by three high-end audio innovative floor-standing speakers two active XS98 and XS95 respectively having 98dB and 95dB of sensitivity and the XS-90 speaker able to perform great sound and featuring one of the most interesting design of the market. Finally also available the larger high quality bookshelf A3-XL and the new beautiful and innovative Speaker Stand a real bass extension enhancer.
- **CABLES & ACCESSORIES**: Renovated all line all cables with Silver, Hybrid Silver and Copper solid core conductor cables in all categories.
 - New power distributor Arno with 6 plugs and aluminium covers into a lacquered wooden chassis. New Line of Gold Note dedicated Phono Tone Arm cables
- **GN RECORDS**: the new line of special vinyl records all in Limited Edition presents some of the best ever made vinyl in the audiophile market now even available the SACD fully master DSD via Gold Note pro electronics. GN records edits, restores and makes master by itself using exclusively Gold Note electronics and the best ever made editing components available.

Analogue

Gold Note has always dedicated a great attention to the vinyl sound designing some of the greatest turntables, tonearms, phono cartridges and phono preamplifiers of the market.

High Quality Vinyl full analogue production

Let us introduce our Five Step Process, nobody does it until now because even the best record labels stop themselves at the first step, finding or producing a good quality master/master tape:

1) Restoring or producing the master

GN Records restores or produces its masters with its own Gold Note brand electronics and with some other apparatus specifically designed for the editing process, following the most sophisticated audiophile philosophy.

2) The cut of the master

It is the process where the record master is physically cut on an aluminium/vinyl dub plate with a specific lathe. GN Records only uses Neumann lathe for STEREO productions, the Neumann VMS70 with SX74 cartridge performing the valve RIAA preamp stage custom Neumann SAL74B o VG66 and a Gold Note one for some specific applications. For MONO productions

the lathe used is the 1957 Lyrec (Ortofon/Philips) SV8 completely and finely restored with valve electronic and NOS cartridges by Ortofon and Neumann.

The Cut of the master is made on a special lacquer called Dub Record for which the best used by GN Records are made of aluminium covered with a special vinyl. GN Records partner doing this important sophisticated work is Roberto Barbolini, one of the only three people in the world specialized in restoring lathes and amplifiers for the cutting process and being probably the best technician available worldwide today doing that.

3) The galvanic treatment

The Dub Record Master is initially sprayed with silver crystals to make the two templates used for moulding/printing process to produce commercial vinyl records.

The quantity of silver crystals first then the time and power of the Nickel galvanic treatment is a fundamental process to lay a perfect quantity of material on the master templates used to print the vinyl records. GN Records follows that process directly. Only the best templates are chosen to keep the genuine originality of the dub master machined record.

4) Making the templates

GN Records only choose the best template of different productions then making only 500 copies with a single template to preserve absolute best performance. At the end of the 500 printed copies the templates are thrown away.

5) Printing of the vinyl

The temperature and pressing time are key factors also. GN Records printing time is five (5) times higher – one minute per copy circa – than standard vinyl production process to ensure the best possible and most silent groove.
